HLW – IP55 OUTDOOR HEATERS

This short wave infra-red heater has been developed to meet the requirements of today's needs for outdoor heating. The heater is weatherproof and is suitable to be used outdoors in any application; it is perfectly safe to be used in the rain and continues to work even when subject to intense water jets. Using a quartz lamp especially tuned to give a warm colour of light it also delivers high energy instant heat. Unlike other outdoor products this heater has very low glare and users feel warm and comfortable from switch – on

Area covered by the heater				
Wall Mounted				
H	X	Y	Z	Area Covered
2.0m	2.3m	2.4m	4.0m	7.6m ²
2.5m	3.0m	3.0m	5.2m	12.3m ²
Overhead Mounted				
H	X	Y	Z	Area Covered
2.0m	3.6m	2.5m		9.0m ²
2.5m	4.8m	3.5m		16.8m ²

The heater can be wall mounted, overhead mounted or fixed under parasols or awnings and combines a robust character with excellent design, making the product ideal for both commercial and domestic applications. For safety the heater is fitted with an attractive stainless finger guard for increased heat output compared with glass fronted models. The lamp is replaceable

These heaters are available in a variety of colours and in both 1500 and 1000 watts.
