

# WHITE ANT METER FRAMES

White Ant Meter Frames are a great alternative to metal meter boxes. Hand crafted and Australian made!

Some of the great features of the White Ant Board are:

- Wooden frames mean no earthing required
- The panels are pre-marked for service fuses and neutral link
- Fully insulated sides and back
- Removable front hinged panel

The White and meter boards are made from Ty-Panel "Type X" switch panel, fire-retardant "FibroCement" back panel, Australian Plantation pine frame and Netalite 7 insulation.

## STANDARD PANELS

The first three sizes are available off the shelf. Custom frames and panels can be ordered

Model	Dimensions	Description
