No cheap inferior plastic parts that break down with ultra violet light or sunlight

A 3D rendering of a square, multi-tiered structure with a grid-like interior, possibly a decorative cage or a specialized container. The structure has a flat, stepped top and a base with a similar stepped design. The interior is filled with a fine, light-colored mesh or grid. The structure is shown from a slightly elevated, angled perspective.

## STICKY PAD INDOOR INSECT TRAPS

NO noise, NO smell, NO debris, NO pollution and NO chemicals

3 Year Warranty - longest known Insect killer Warranty in the world (tubes & starters not incl.)

Compared to many competitors our products have the most effective insect killing rates in the world

Ideal for restaurants, small size shops, kitchens, canteens & domestic living areas

Fully compliant with all required Australian and European certified safety standards

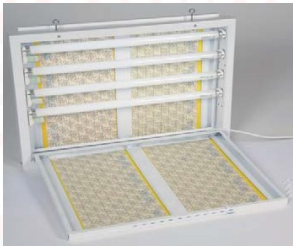

Our unique ultra violet "Black light" tubes are one of the most effective "insect attracting" tubes on the market - many cheaper brands typically use inferior tubes that attract fewer insects.

Shatterproof globes also available - they give full protection against glass fragments falling into food

We don't use inferior plastic parts that break down with ultra violet light or sunlight.

Yellow attractant adhesive degradable sticky pad ( replace approx. every month)

Smooth slim line look - clean and effective
